salauddin-portfolio-two.vercel.app | github.com/salauddin85 | linkedin.com/in/salauddinahmed85

SUMMARY

Software Developer with nearly 2 years of expertise in building maintainable software systems across the full SDLC. Proven track record delivering production systems including AI-HRM, Club, School, Hospital Management, and Multi-vendor E-commerce workflows. Eager to tackle new engineering challenges, adapt to emerging technologies, and drive high-impact client solutions.

PROFESSIONAL EXPERIENCE

Junior Software Developer - PEPOLTEK LTD

December 2024 - September 2026

- Developed scalable REST APIs using Django REST Framework and maintained production-grade backend systems.
- Architected backend infrastructure for **Club Member Management System, Talent Tracker(talentracker.net), and Pepoltek (pepoltek.com)** using DRF, TypeScript, and Docker, supporting **1000+** active users.
- Delivered **15+ full-stack features** for AI-HRM TalenTEK using Next.js and JavaScript; automated deployment pipelines to cut release cycle times from **4 hours to 30 minutes**.
- Improved API performance (~**30%**) through caching strategies and optimized database queries.
- Managed VPS deployments and production systems, reducing infrastructure costs by ~**20%** via server optimization.

SKILLS

Languages: Python, JavaScript, C, C++, Java, SQL

Web Technologies: NextJS, TypeScript, React, JavaScript, Zustand, CSS, HTML5.

Frameworks: Django, Django REST Framework (DRF)

Databases: MySQL, PostgreSQL, SQLite, Redis

Paradigms: Object-Oriented Programming (OOP) in Python, Async programming, Functional programming

Tools: Git, GitHub, Gitlab, Bitbucket, VS Code, Antigravity, Pycharm, Postman, Swagger, Pytest

DevOps: CI-CD, AWS, VPS, Docker, Terraform, Web server (Nginx), Linux, Grafana, Loki, Prometheus

AI Technologies: Generative AI, LLMs, RAG, Prompt Engineering, Vector Embeddings, pgvector, AI Agents, OpenAI API

Design: System Design(Basic), Factory, Singleton, Strategy, Repository, Observer|Monolith, Microservices|SOLID, DRY, KISS

Problem solving: LeetCode(150+), Codeforces(120+), HackerRank(150+)

EDUCATION

B.Sc. in Computer Science & Engineering

April 2026 — Expected graduation October 2029

Northern University Bangladesh

Diploma in Computer Science & Technology

May 2021 — March 2026

Brahmanbaria Government Polytechnic Institute

CGPA 3.51 out of 4.00

PROJECTS

Multi-Vendor E-commerce Platform

[Live](#)

[GitHub](#)

Technologies: Django, DRF, PostgreSQL | Next.js | Typescript | Zustand | Docker | Nginx

- RBAC & Verification Workflows:** Designed a robust **4-tier role**-based access architecture (Admin, Vendor, Brand, Customer) with JWT authentication and strict approval pipelines for vendor onboarding and product publishing.
- Order Orchestration & Fintech Integration:** Implemented an atomic multi-vendor cart and checkout engine with split-order fulfillment capabilities, integrated with **SSLCommerz** payment gateway for secure transaction lifecycle management.
- State Management & Dynamic UI:** Implemented high-performance vendor and customer storefront interfaces using Next.js, TypeScript, and Zustand for real-time cart synchronization and responsive dashboard metrics.
- Scalable Backend & DevOps:** Structured a modular REST API backend with optimized PostgreSQL indexing, reducing average response latency by **25%** under containerized Docker/Nginx environments.

TALenTEK – Enterprise Multi-Tenant AI-HRM Platform

[Live](#)

Technologies: Python, Django, DRF, PostgreSQL, Pgvector, Next.js, Zustand, Redis, Docker, CI/CD, Nginx, Linux, Cloudflare

- AI-Driven Screening & Interviews:** Spearheaded an LLM and pgvector parser cutting CV screening time by ~**65%**, alongside an autonomous interview engine with AI proctoring.
- Smart Onboarding & JD Builder:** Developed a chunked RAG chatbot for new-hire policy retrieval, indexing **100+ policy docs** and reducing manual HR queries by **40%**, alongside an automated JD builder with clarity scoring.
- Interactive ATS (Kanban):** Constructed a real-time applicant tracking pipeline using Next.js 16, @dnd-kit, and Zustand featuring optimistic UI updates.
- Multi-Tenancy, Fintech & DevOps:** Architected zero-trust tenant isolation with SSLCommerz billing; containerized services via Docker, cutting release time from **4 hrs to 30 mins**.

COURSE & CERTIFICATIONS

Backend Web Development (Django & DRF) | Phitron — [Certificate]

Professional Spoken English Training | 3-Month Program — [Certificate]

DevOps Fundamentals | Ostad — [Certificate]

LANGUAGES

• **English** (Professional) • **Bengali** (Native)
